About The Lab Cab

The Lab Cab takes the lab to the patient. Its technicians travel to private homes, clinics, nursing homes and assisted living facilities to perform professional lab draws, so patients skip the drive and the waiting room.

The company has more than ten years of experience in mobile lab services and prices its work to make sense for families, providers and care communities. It works with local health care providers and acts as the logistics team: the patient's own provider orders and reviews the tests, and The Lab Cab gets the sample drawn and delivered.

Mission. Make quality lab services affordable, reliable and convenient by removing travel, waiting rooms and scheduling friction.

What sets it apart

- Care comes to the patient, including seniors and homebound patients.
- Draws are done within the patient's own provider network, which supports accurate results and swift turnaround.
- Weekday availability, plus emergency calls on weekends.
- STAT orders accommodated, with 24 hours' notice preferred.

Services

The Lab Cab offers affordable, professional mobile lab draws at homes, clinics and nursing homes, available seven days a week (weekends for emergency calls). Four service lines make up the offer.

1. Mobile Lab Services. Professional in-home lab draw services designed around the patient's needs.

2. Home Visits. Technicians come to the patient's home at a time that works for them, so there is no waiting room and no trip to a lab.

3. Clinic Support. Partnerships with clinics to provide flexible, on-demand mobile lab draw services, helping practices extend care beyond their walls.

4. Nursing Home & Assisted Living Services. Routine and scheduled lab work for residents, which is essential and often difficult for facilities to coordinate.

Who we serve

The Lab Cab is made for the places where people need care but can't easily get to a lab.

Client	Who they are	How we help
Private homes	Busy families, seniors and homebound patients	In-home draws at a convenient time
Clinics	Practices that want to extend care beyond their walls	Supplemental, on-demand lab draw support
Nursing homes and assisted living	Facilities and their residents	Routine and scheduled testing for residents

The company also keeps clients up to date with the latest information on its services.

How it works

Booking takes a call or a short online form. The Lab Cab prefers 24 hours' notice but works to accommodate urgent needs, including STAT orders.

1. Call or text (612) 990-2171, or submit the online appointment request.
2. Share the preferred date, a convenient time window and the location type (home, clinic or nursing home).
3. Confirm that you agree to be contacted about the request.

4. A technician arrives at the agreed time and performs the draw.
5. The patient's provider receives the results through the existing provider network.

The booking form asks for name, phone, email, preferred date, time window, location type and an optional message.

Service area and hours

The Lab Cab serves private homes, clinics, nursing homes and assisted living facilities in and around the Twin Cities metro area.

Day	Availability
Monday–Friday	6:00 am–3:00 pm
Saturday–Sunday	Emergency calls only

Open question: the website's service area card currently reads "ABC" and the Friday hours are cut off. Confirm the exact cities or counties and the Friday hours before publishing this profile externally.

Why choose The Lab Cab

- **Experienced.** More than ten years of mobile lab experience; trained, professional and trusted.
- **Affordable.** Quality care priced to fit the client's budget.
- **Reliable and convenient.** No driving, no waiting rooms, no hassle.
- **Network-aligned.** Tests done within the patient's own provider network make results more accurate and turnaround faster.
- **Flexible.** Weekday service, weekend emergency calls and STAT orders.
- **Collaborative.** Works with several local health care providers around the Twin Cities.

Common questions and contact

The website answers five questions: where The Lab Cab provides draws, how to schedule a visit, how long a visit takes, whether it works with the patient's doctor, and whether service is one-time or recurring. The first answer is public: draws happen at private homes, clinics, nursing homes and assisted living facilities. Answers to the other four should be confirmed and added here.
